

# Configure Turnitin assignment settings in LumiNUS

Turnitin submission folders have settings, which apply to the Turnitin submission folder only.

 The Turnitin settings are separate from the LumiNUS [open/close](#) and [permissions](#) settings.

The LumiNUS open/close and permissions settings apply to all folders, whether they are Turnitin folders or not.

## Steps

- 1 [Enter the Turnitin submission folder](#)
- 2 [Enter Settings](#)
- 3 [Configure basic settings](#)
- 4 [Configure Optional Settings](#)
  - 4.1 [Submission settings](#)
  - 4.2 [Compare against](#)
  - 4.3 [Similarity Report](#)
  - 4.4 [Additional settings](#)

## Enter the Turnitin submission folder

In Files, click the Turnitin submission folder for which you want to configure the settings.

**Feedback Release Date**  
2020-05-26 00:00 +08

## Configure basic settings

1. You can leave Max Grade as 100. **We advise against using Turnitin for storing marks.** Please use LumiNUS [Gradebook](#) instead. Your ability to e-annotate Turnitin assignments is not affected.
2. The Start Date, Due Date and Feedback Release Date are greyed out. They can be [configured in the LumiNUS folder settings](#).

The Feedback Release Date is the date that students can view your e-annotations on their submissions.

If you want to configure the Feedback Release Date, [access the folder settings](#), toggle *Set Feedback Release Date for Turnitin Folder* to **Yes**, then enter the desired date and Save.

3. Check if you want to enable PeerMark. [More about PeerMark](#) on Turnitin's help site.
4. Expand for *Optional Settings*, which control important settings for the Turnitin submission folder.

## Configure Optional Settings

There are many optional settings that are available. You can [read about all the optional settings](#) on Turnitin's help site.

This guide will highlight some settings with important implications.

### Click Submit one you are done

Remember to click **Submit** at the bottom of the optional settings once you are done. The settings are not auto-saved.

## Submission settings

There are several options for *Submit papers to*. In most cases, you should leave it as **Standard paper repository**.

If you intend for the students to submit drafts, and you have a separate Turnitin submission folder for the final submission, you should change *Submit papers to* **Do not store the submitted papers**. This is so that the drafts are not compared to the final submissions.

Generally, you will leave *Allow submission of any file type* unchecked. If you check this option, students can submit non-textual files, which will not be subject to similarity checking.

## Submission settings

Submit papers to

Standard paper repository

- Allow submission of any file type ?
- Allow late submissions ?
- Enable grammar checking using ETS® e-rater® technology ?
- Attach a rubric ?

### Compare against

These settings allow you to choose which repositories your students' work will be checked against. Generally, you will check all four.

If you want to use Turnitin for e-annotation only (i.e. you are not using Turnitin to check for similarity), you can deselect all the repositories. In this case, you will also want to change *Submit papers to* **Do not store the submitted papers** (refer to Submission settings above).

### Compare against

- Student paper repository
- Institution student paper repository
- Current and archived web site content
- Periodicals, journals and publications

### Similarity Report

There are three options for *Generate Similarity Reports for student submission*.

Most users will choose **Generate reports immediately (students can resubmit until due date): After 3 resubmissions, reports generate after 24 hours**.

If you do not want to allow resubmission, choose **Generate reports immediately (students cannot resubmit)**.

You can also choose to **Generate reports on due date (students can resubmit until due date)**.

Notwithstanding when the reports are generated, you can also choose whether the students can view the Similarity Report. Check *Allow students to view Similarity Reports*, in order for them to do so.

## Similarity Report

Generate Similarity Reports for student submission

Generate reports immediately (students can result ⌵)

- Allow students to view Similarity Reports [?](#)
- Exclude bibliographic materials [?](#)
- Exclude quoted materials [?](#)
- Exclude small sources [?](#)

### Additional settings

Check *Save these settings for future use* if all the optional settings you set are to be used for other Turnitin submission folders that you create in the future.
